Transplant: Feed your plants VitaMax Pro™ to counteract the shock of transplant. Switch to mild formula as plant growth begins again.

Mild Transplant: A comprehensive blending of products designed to grow smaller plants, or those requiring less nutrient strength.

Strong Formula: A concentrated formulation for aggressive feeders and larger plants.

Pre-Flowering: specific to the critical stage where plants are in the process of switching their energy focus. A high-powered formula to ensure the plant is properly supplied with nutrients for the development of flowers and fruit.

ESPAÑOL

Transplant: Feed your plants VitaMax Pro™ to counteract the shock of transplant. Switch to mild formula as plant growth begins again.

Mild Transplant: A comprehensive blending of products designed to grow smaller plants, or those requiring less nutrient strength.
